

Lighting Control Systems

Chroma 1SD Key Pad

The Chroma 1SD Key Pad provides eight programmed light shows with four thousands steps. The 1SD includes a micro SD card slot for programming storage. We custom program each key pad to fit and maximize the design specification of the installation. This easy to operate, affordable and powerful key pad includes one control universe. The Chroma Key 1SD can be wall or surface mounted.

Cost effective control option for VersaLamp, VersaPin Deck & VersaCap Simple Lighting Systems.

Great control option for VersaLamp, VersaPin Deck, VersaCap Simple & Pixel Lighting Systems.

Chroma Tablet Lighting Control System

Our Chroma Tablet Lighting Control System provides lighting control through a simple to use wireless Apple iPad. The system is custom programmed with all of the systems lighting systems capabilities. The programming is stored on in the control interface and effortlessly recalled by the iPad. The base system includes two control universes and can be expanded limitlessly. System includes Apple iPad , locking table top mount, wireless router and all control cables.

Chroma PC Lighting Control System

The Chroma PC Lighting Control includes industry standard Madrix lighting control software and a multi-universe software key. The system uses a powerfully Lenovo laptop PC with an Intel i5 processor. DFX maps the programming to the lighting design. The programming includes more than fifty detailed light shows. An unlimited number of shows can be created.

Unlimited lighting control option for VersaLamp, VersaPin Deck, & VersaCap Pixel Lighting Systems.

Unlimited control for all Versa lighting product, audio and video systems.

Chroma Automated Control System

Our premier Automated Control System provides a straightforward touch panel to operate the DFX Versa Line of lighting products. The structure of the system includes a reliable Crestron backbone with multiple universes and programmed lighting control. The intuitive system programming runs the gamut of light shows and features. The touch panels are secured by multi-level password protection. The control features of the system can be easily expanded to include audio, video and additional lighting systems.
