

VersaCap LED Cap Lighting System

Transform Your Lighting

VersaCap LED Cap Lighting System is the most unique bowling cap lighting system available. The system provides full color RGB (red, green & blue) LED lighting. Bright LED lamps create millions of color combinations and limitless lighting effects. The system is operated by a DMX lighting controller. Colored effects and patterns can be specific to a single lane or any combination of lanes. The system is delivered fully programmed with custom programming available. Systems can be integrated in new and retro-fit applications. Installation is a snap with minimal expertise needed. Systems designed for any number of lanes. It is the only system that can be seamlessly integrated with the VersaLamp Pin Deck & VersaLamp line of lighting products.

Specifications:

- **LEDs:**
 - Bright, daylight visible tri-color RGB LEDs.
 - 16.7 Millions of colors.
